About the Stibitz-Wilson Awards

SINCE 1997, the American Computer & Robotics Museum has presented the Stibitz-Wilson Awards to celebrate innovators at the leading edge of the computational and biological sciences.

Meet the 2023 Honorees

DR. SYLVIA EARLE is President and Chairman of Mission Blue/The Sylvia Earle Alliance. She is a National Geographic Society Explorer in Residence, and is called "Her Deepness" by the New Yorker and the New York Times, "Living Legend" by the Library of Congress, and "First Hero for the Planet" by Time.

NATURE has brought the beauty and wonder of the natural world into American homes for more than 40 years, and is one of the most watched documentary film series on public television. Accepting the award for NATURE are Executive producer Fred Kaufman, Series Producer Bill Murphy, and Series Editor Janet Hess.

GREGORY ROBINSON spent four years as Director of NASA's James Webb Space Telescope Program, the largest and most complex space science observatory ever flown in space. His visionary leadership was instrumental to the success of Webb's mission – a mission that is now delivering images of an unexplored universe.
